

FLUSH LESS

Flushing uses more water than anything indoors; two fewer flushes a day keeps water in the reservoirs.

WASH ONLY FULL LOADS

Make sure your washing machine is fully loaded before hitting the start button.

Early snowfall in the mountains does not mean the drought is over.

2002 brought us the worst drought in memory and we don't know when it will end. What we do know is that our reservoirs typically are more than 80 percent full this time of year. This year, they are only 46 percent full. Denver Water's goal is to keep as much water as we can in our reservoirs, and to do it...

...we need the help of all our customers.

It may not seem that you can save much water indoors in the winter but those water drops add up when you multiply them by more than a million people.

Here are the top three ways to save water indoors. It's not that tricky; just follow the advice of this old dog.

OLD DOGS CAN LEARN NEW TRICKS! CAN PEOPLE?

Shower Quickly

Five minutes is max.

Flush Less

Two fewer flushes a day cuts
your indoor use the most.

Wash Only Full Loads

Two fewer loads a week
saves water for next year.

Learn these “tricks”
and help get us all through
to the spring runoff.

SHOWER QUICKLY

Take a five-minute shower and
set an example for the teenagers
in your house.
